Happy New Year! Thank you for taking a few minutes to read our newsletter. We've hand-picked the following articles in response to questions that we have been hearing from our clients and radio listeners over recent months; we hope you find them valuable!

In this issue of our quarterly newsletter, we evaluate how we spent our money in 2018, cover key retirement and tax figures for the year ahead, discuss your role in financially educating your teens, and bring light to some of the challenges that women still face in planning for retirement.

Be sure to tune in to AM790, weeknights at 5PM, to hear Don, Steven, Donna and Nathan discuss the topics that matter to you on the MoneyTalk radio program: *Southern New England's choice for financial talk for 27 years!* Missed tonight's show? Listen in to the MoneyTalk Podcast by searching "DON SOWA'S MONEYTALK" wherever you get your podcasts!

Q1 - 2019

- Key Retirement and Tax Numbers for 2019
- Talking to Your Teen About Money
- Women: Are you planning for retirement with one hand tied behind your back?
- Can a flexible work schedule help you stay in the workforce after having children?

What Happened to Your Money?

If you don't know what happened to your money during the past year, it's time to find out. December and January are the perfect months to look back at what you earned, saved, and spent, as W-2s, account

statements, and other year-end financial summaries roll in.

How much have you saved?

If you resolved last year to save more or you set a specific financial goal (for example, saving 15% of your income for retirement), did you accomplish your objective? Start by taking a look at your account balances. How much did you save for college or retirement? Were you able to increase your emergency fund? If you were saving for a large purchase, did you save as much as you expected?

How did your investments perform?

Review any investment statements you've received. How have your investments performed in comparison to general market conditions, against industry benchmarks, and in relationship to your expectations and needs? Do you need to make any adjustments based on your own circumstances, your tolerance for risk, or because of market conditions?

Did you reduce debt?

Tracking your spending is just as important as tracking your savings, but it's hard to do when you're caught up in an endless cycle of paying down your debt and then borrowing more money. Fortunately, end-of-year mortgage statements, credit card statements, and vehicle financing statements will all spell out the amount of debt you still owe and how much you've really been able to pay off. You may even find that you're making more progress than you think. Keep these paper or online statements so you have an easy way to track your progress next year.

Where did your employment taxes go?

If you're covered by Social Security, the W-2 you receive from your employer by the end of January will show how much you paid into the Social Security system via payroll (FICA) taxes collected. If you're self-employed, you report and pay these taxes (called self-employment taxes) yourself. FICA taxes help fund future Social Security benefits, including retirement, disability, and survivor benefits, but many people have no idea what they can expect to receive from Social Security in the future.

This year, get in the habit of checking your Social Security Statement annually to find out how much you've been contributing to the Social Security system and what future benefits you might expect, based on current law. To access your Statement, sign up for a *my* Social Security account at the Social Security Administration website, socialsecurity.gov.

Did your finances improve?

Once you've reviewed your account balances and financial statements, your next step is to look at your whole financial picture. Taking into account your income, your savings and investments, and your debt load, did your finances improve over the course of the year? If not, why not?

Next, it's time to think about the changes you would like to make for next year. Start by considering the following questions:

- What are your greatest financial concerns?
- Do you need help or advice in certain areas?
- Are your financial goals the same as they were last year?
- Do you need to revise your budget now that you've reviewed what you've earned, saved, and spent?

Use what you've learned about your finances to set your course for the new year ahead. Challenge yourself to save more and spend less so that you can make steady financial progress.

Key Retirement and Tax Numbers for 2019

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans and various tax deduction, exclusion, exemption, and threshold amounts. Here are a few of the key adjustments for 2019.

Employer retirement plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to \$19,000 in compensation in 2019 (up from \$18,500 in 2018); employees age 50 and older can defer up to an additional \$6,000 in 2019 (the same as in 2018).
- Employees participating in a SIMPLE retirement plan can defer up to \$13,000 in 2019 (up from \$12,500 in 2018), and employees age 50 and older can defer up to an additional \$3,000 in 2019 (the same as in 2018).

IRAs

The combined annual limit on contributions to traditional and Roth IRAs increased to \$6,000 in 2019 (up from \$5,500 in 2018), with individuals age 50 and older able to contribute an additional \$1,000. For individuals who are covered by a workplace retirement plan, the deduction for contributions to a traditional IRA is phased out for the following modified adjusted gross income (AGI) ranges:

	2018	2019
Single/head of household (HOH)	\$63,000 - \$73,000	\$64,000 - \$74,000
Married filing jointly (MFJ)	\$101,000 - \$121,000	\$103,000 - \$123,000
Married filing separately (MFS)	\$0 - \$10,000	\$0 - \$10,000

Note: The 2019 phaseout range is \$193,000 - \$203,000 (up from \$189,000 - \$199,000 in 2018) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered.

The modified AGI phaseout ranges for individuals to make contributions to a Roth IRA are:

	2018	2019
Single/HOH	\$120,000 - \$135,000	\$122,000 - \$137,000
MFJ	\$189,000 - \$199,000	\$193,000 - \$203,000
MFS	\$0 - \$10,000	\$0 - \$10,000

Estate and gift tax

- The annual gift tax exclusion for 2019 is \$15,000, the same as in 2018.
- The gift and estate tax basic exclusion amount for 2019 is \$11,400,000, up from \$11,180,000 in 2018.

Kiddie tax

Under the kiddie tax rules, unearned income above \$2,200 in 2019 (up from \$2,100 in 2018) is taxed using the trust and estate income tax brackets. The kiddie tax rules apply to: (1) those under age 18, (2) those age 18 whose earned income doesn't exceed one-half of their support, and (3) those ages 19 to 23 who are full-time students and whose earned income doesn't exceed one-half of their support.

Standard deduction

	2018	2019
Single	\$12,000	\$12,200
HOH	\$18,000	\$18,350
MFJ	\$24,000	\$24,400
MFS	\$12,000	\$12,200

Note: The additional standard deduction amount for the blind or aged (age 65 or older) in 2019 is \$1,650 (up from \$1,600 in 2018) for single/HOH or \$1,300 (the same as in 2018) for all other filing statuses. Special rules apply if you can be claimed as a dependent by another taxpayer.

Alternative minimum tax (AMT)

	2018	2019
Maximum AMT exemption amount		
Single/HOH	\$70,300	\$71,700
MFJ	\$109,400	\$111,700
MFS	\$54,700	\$55,850
Exemption phaseout threshold		
Single/HOH	\$500,000	\$510,300
MFJ	\$1,000,000	\$1,020,600
MFS	\$500,000	\$510,300
26% rate on AMTI* up to this amount, 28% rate on AMTI above this amount		
MFS	\$95,550	\$97,400
All others	\$191,100	\$194,800

*Alternative minimum taxable income

Talking to Your Teen About Money

Parents play an important role in shaping their children's financial behaviors and attitudes toward money.

You probably feel comfortable talking to your teen about things like school, sports, and clothing. But how do you feel about talking about money? While it may be a tricky topic to broach, odds are that your teenager will rely on you to learn basic financial management skills. And the teenage years can be a critical learning period. According to a report by the Consumer Financial Protection Bureau, it's important to establish strong financial decision-making habits in the teen years because it will help your child better navigate his or her financial life as an adult.¹

Prepare your teenager for the financial challenges of adulthood by talking to him or her about the following topics.

Handling an income

Whether your teen earns an allowance from you or works a part-time job, he or she will need guidance on what to do with the income. Set some expectations regarding your teen's pay. How much of it will be discretionary? Will your teen start contributing to his or her share of a monthly cell phone bill, or would you prefer for your child to set aside a portion of each paycheck for college?

When your teen earns his or her first paycheck, take time to sit down and review the information on the pay stub or online statement. Help your child understand what certain terms mean, such as gross pay, net pay, federal income tax, state income tax, Social Security tax, and Medicare tax. Show your teen how income taxes can affect take-home pay.

Building a budget

Help your teen learn to be accountable for his or her finances by developing a spending plan. Start by listing all sources of regular income (e.g., an allowance or earnings from a part-time job). Next, ask your teen to identify regular expenses. Depending on what you and your child have agreed on, that might include car insurance, a cell phone bill, or clothing expenses. Take the total expenses and subtract them from your teen's total income.

If this exercise shows that your child won't have enough income to meet his or her expenses, help your teen come up with a plan for making up the shortfall. Suggest ways to earn more money or cut back on expenses, but resist the temptation to bail out your teen. The point of establishing a budget is to give your child a taste of what it's like to earn an income and pay expenses without running out of money.

Setting and saving for financial goals

In the past, your teenager probably came to you for money to pay for items that he or she wanted. Now that your teen has a steady source of income, it's time for him or her to make purchases independently. Your child may be ready to start saving for larger goals such as a new computer or a car and longer-term goals such as college. Encourage your teen to save by putting these goals in writing to make them more concrete. Consider offering incentives, such as matching what your teen saves toward a long-term goal. For example, for every dollar your child sets aside for college, you might contribute 50 cents or more.

Remember to praise your teen for showing responsibility when a goal is reached. Your approval, as well as the sense of accomplishment your teen will feel, can help reinforce healthy savings habits.

Getting familiar with credit

While credit card companies require an adult to co-sign a credit card agreement before they will issue a card to someone under the age of 21, you shouldn't ignore the credit card issue altogether. Teach your teen about establishing and maintaining good credit. Explain how credit card interest is calculated and emphasize the importance of paying bills on time. Don't be afraid to share your experience using credit with your child — personal examples can be a great way to help him or her learn.

Becoming a smart shopper

Encourage your teenager to spend money wisely. Teach your child to ask questions before making a purchase, such as:

- Why do I want this item? Am I buying something because I really want it, or because all of my friends have it?
- Can I really afford this item?
- Do I need to buy this item now, or can I set aside money to buy it at a later time?
- Am I getting a good deal on this item, or should I shop around for a more affordable alternative?

Remember that talking to your teenager about money now can help him or her establish a more financially stable future.

Women: Are you planning for retirement with one hand tied behind your back?

Women can face unique challenges when planning for retirement. Let's take a look at three of them.

First, women frequently step out of the workforce in their 20s, 30s, or 40s to care for children — a time when their job might just be kicking into high (or higher) gear.

It's a noble cause, of course. But consider this: A long break from the workforce can result in several financial losses beyond the immediate loss of a salary.

In the near term, it can mean an interruption in saving for retirement and the loss of any employer match, the loss of other employee benefits like health or disability insurance, and the postponement of student loan payments. In the mid term, it may mean a stagnant salary down the road due to difficulties re-entering the workforce and/or a loss of promotion opportunities. And in the long term, it may mean potentially lower Social Security retirement benefits because your benefit is based on the number of years you've worked and the amount you've earned. (Generally, you

need about 10 years of work, or 40 credits, to qualify for your own Social Security retirement benefits.)

Second, women generally earn less over the course of their lifetimes. Sometimes this can be explained by family caregiving responsibilities, occupational segregation, educational attainment, or part-time schedules. But that's not the whole story. A stubborn gender pay gap has women earning, on average, about 82% of what men earn for comparable full-time jobs, although the gap has narrowed to 89% for women ages 25 to 34.¹ In any event, earning less over the course of one's lifetime often means lower overall savings, retirement plan balances, and Social Security benefits.

Third, statistically, women live longer than men.² This means women will generally need to stretch their retirement savings and benefits over a longer period of time.

Can a flexible work schedule help you stay in the workforce after having children?

Yes, it just might be the key. Your job is the foundation for general financial security, including retirement. In addition to providing you with a steady salary and valuable employee benefits, it typically brings with it the ability to save in a tax-advantaged employer-sponsored retirement plan like a 401(k), and if you're lucky, a pension. It also allows you to start qualifying for Social Security retirement benefits.

Women and men may start out on relatively equal financial footing in their 20s. But when children come along, women are much more likely to take time out of the workforce to care for them.¹ A common refrain is "my salary would just go to daycare costs anyway, so what's the point?" This is often true. But it's really not fair for one parent to assume sole responsibility for child-care costs; it is a *shared* financial responsibility that both parents should take on.

Many women want to keep at least one foot in the workforce after having children, not only for financial reasons but also for career mobility and personal fulfillment. If you'd like to keep

working but can't accommodate the traditional, 40-hour-per-week, in-office schedule, consider requesting a modified schedule if your job allows it. This could mean telecommuting from home one or more days per week, having a flexible work schedule (such as 11 a.m. to 7 p.m.), working part-time, or some combination thereof. In many cases, a flexible work arrangement can be the difference between staying in the workforce or having to leave it, so consider exploring this possibility before you exit prematurely.

Think about what your ideal work arrangement would be and request a meeting with your manager to discuss your well-thought-out proposal. This plan should include a trial period after which both sides can come back to the table and evaluate how things are working. Employers are increasingly recognizing that flexible schedules are key to having a diverse, gender-neutral workforce. In the end, asking for a flexible schedule might just allow you to keep that steady salary and continue saving for retirement.
